PROFESSIONAL SUMMARY

Front-End Developer specializing in React, Next.js, and TypeScript, with experience building complete applications from design to deployment using Tailwind CSS and Supabase. Holds a Bachelor's degree in Computer Science and completed a specialized Front-End Development training program. Passionate about building clean, high-performance interfaces.

EXPERIENCE

Front-End Developer Intern (JISR HR)

April - July 2026

- Completed a Front-End Developer internship focused on modern frontend development practices, including React and component-based architecture.
- Built responsive user interfaces and reusable components as part of structured, hands-on frontend development exercises.
- Practiced translating requirements into functional user interfaces within a guided development workflow.
- Collaborated with peers and trainers to apply frontend development best practices and receive feedback on code quality.

PROJECTS

AI Fitness Coach

Full Stack

- Developed a full-stack AI-powered fitness platform delivering personalized workout plans, nutrition tracking, and progress monitoring using React, TypeScript, and Supabase.
- Integrated the Gemini API to power a conversational AI fitness coach and implemented AI-based food image recognition for nutrition logging.
- Designed a PostgreSQL data model with Supabase Auth and Row Level Security (RLS) to manage persistent, secure user data.
- Built secure AI workflows through Supabase Edge Functions and integrated the OpenFoodFacts API for food data lookup.
- Implemented bilingual English/Arabic support with full RTL layout and visualized user progress with Recharts across a responsive interface.

Scalable E-Commerce Application

- Developed a scalable e-commerce web application with a modular, maintainable architecture using React.js and TypeScript.
- Implemented global state management with Redux Toolkit, using async thunks to handle API calls for product and cart data.
- Applied strict TypeScript interfaces across components and state logic to ensure type safety.
- Integrated RESTful APIs for product listing, filtering, cart management, and checkout flow, with dynamic routing via React Router.
- Optimized application performance through lazy loading, code splitting, and a Vite-based build configuration.

Habit Tracker

- Built a habit tracking application with React and TypeScript, using Supabase and PostgreSQL for persistent data storage.
- Implemented full CRUD functionality for creating, updating, and managing habits and their daily completions.
- Developed date-based habit tracking and streak calculation logic using date-fns.
- Designed reusable UI components and state management to maintain a consistent, responsive experience across the app.

EDUCATION

BMS Institute of Technology | Bangalore, India

B.E. in Computer Science & Engineering

2021 - 2025

SKILLS

Front-End

- React.js, Next.js, JavaScript, TypeScript
- HTML5, CSS3, Tailwind CSS
- Redux Toolkit, React Router
- Recharts, Responsive Design
- Component Architecture, State Management

Back-End

- Supabase, PostgreSQL, Supabase Auth
- Supabase Edge Functions, Row Level Security (RLS)
- REST APIs, Gemini API, OpenFoodFacts
- Git, GitHub, Vite
- Type Safety, Performance Optimization

Soft Skills:

- Leadership
- Collaboration
- Communication
- Time Management
- Problem solving

Languages:

- Arabic
- English
